

Need a Custom Solution?

We can create peptide pools for any target epitope, provided its sequence is known.

Here at Virax, we understand that peptide pools can feature in a variety of workflows and research applications. That's why we offer a range of custom peptide solutions tailored to meet your research needs.

As long as your target epitope is known, we can create a custom peptide pool solution that is cheaper, easier to use and more effective than antigen-based methods.
