None under normal conditions. 5.2b Unusual fire & explosion hazards: No unusual fire or explosion hazards noted. 5.2c Protective measures in fire: Use protective equipment appropriate for surrounding materials. 5.3 Advice for firefighters: Special firefighting procedures: Use water spray or fog for cooling exposed containers. Exercise 5.3a caution when fighting any chemical fire. Do not dispose of fire-fighting water in the environment. 5.3b Special protective equipment and precautions for Do not enter fire area without proper protective equipment, including firefighters: respiratory protection. Wear self-contained breathing appartus and protective suit (see Section 8). Section 6: Accidental release measures Personal precautions, protective equipment, and emergency procedures: 6.1a No specific emergency measures are required other than good General release measures: laboratory hygiene and safety practices for small spills. Wear suitable protective clothing, gloves and eye or face protection. Consult professional emergency personnel if concerned (see Section 8). 6.1b Advice for non-emergency personnel; personal No specific emergency measures are required other than good precautions, protective equipment and emergency laboratory hygiene and safety practices. Wear suitable protective procedures: clothing, gloves, eye, or face protection to avoid contact with skin, eyes, and personal clothing; use an approved supplied-air respirator, in case of emergency (also refer to Section 8). Ensure adequate ventilation and control mist. Avoid breathing vapors, mist, or spray. Evacuate personnel to safe areas. Wear suitable protective clothing, gloves and eye or face protection to prevent any contamination. Consult professional emergency personnel if concerned. 6.1c Advice for emergency responders; personal Wear suitable protective clothing, gloves and eye or face protection to precautions, protective equipment and emergency avoid contact; use an approved supplied-air respirator, in case of procedures: emergency (also refer to Section 8). 6.2 Environmental precautions: Do not allow to enter drains, sewers, or watercourses. May be harmful to the environment if large amounts are released. 6.3 Methods and materials for containment and clean Contain any spills with dikes or absorbent materials to prevent migration and entry into sewers or water sources. Use a licensed waste up: disposal contractor for disposal (see Section 13). Wash spill area thoroughly with plenty of soap and water. Avoid contact with skin or inhalation of spillage or vapor. 6.4 Reference to other Sections: Refer to Sections 8 and 13 for additional information. Section 7: Handling and storage Precautions for safe handling/Protective measures: Do not handle until all safety precautions have been read and 7.1 understood. Avoid creation of aerosols and mist. Avoid inhalation of vapors or mist. Prevent contact with skin and eves. Use appropriate personal protection equipment (PPE). Thoroughly wash hands and contaminated areas with water and soap before leaving the work site. Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. 7.1a Prevent handling of incompatible substances or Avoid contact with strong acids and strong oxidizers. mixtures: 7.1b Do not eat, drink, or smoke in work areas. Wash hands after use. Advice on general occupational hygiene: Remove contaminated clothing and protective equipment before entering eating areas. Good personal hygiene is necessary. Follow good laboratory hygiene and safety practices. 7.2 Refer to product label. Store in a cool place. Keep the container tightly Conditions for safe storage, including any closed in a dry and well-ventilated place. Containers which are opened incompatibilities: must be carefully resealed to prevent leakage. Avoid spills and release into the environment; keep away from watercourses. 7.3 Specific end use(s): For research use only. Not for use in diagnostic procedures.
